Mr Vijay Kumar Sir

Department Of Computer Applications

KIET GROUP OF INSTITUTIONS, DELHI-NCR, GHAZIABAD-201206

Introduction

Title: Edu Connect: Smart Student Portal

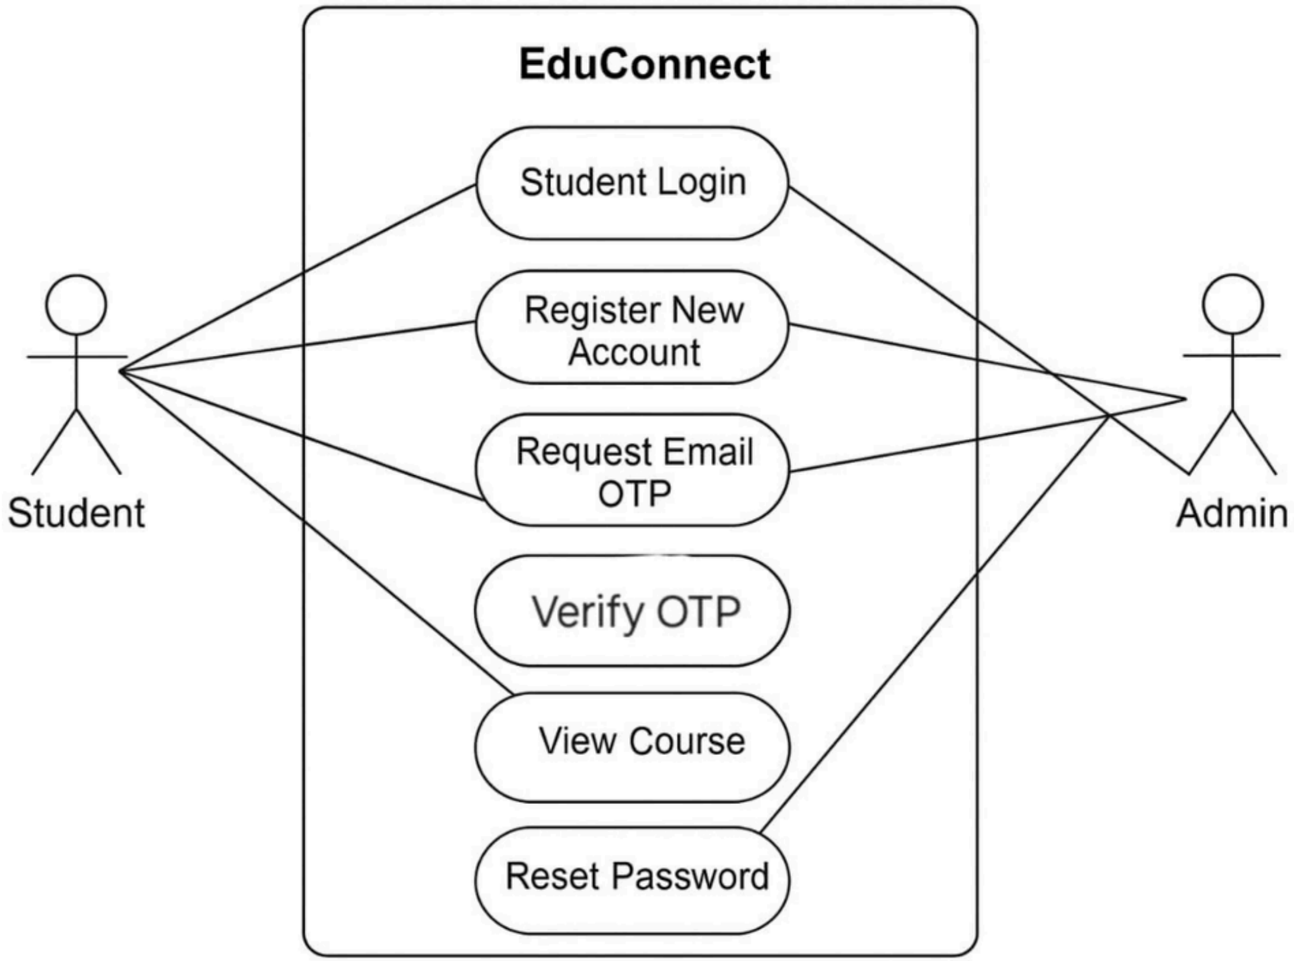

Edu Connect is a comprehensive digital platform designed to serve as a central hub for students, teachers, and administration. It aims to modernize the campus experience by replacing traditional, manual processes with an efficient online system, ensuring that everyone stays connected and informed.

Problem Statement

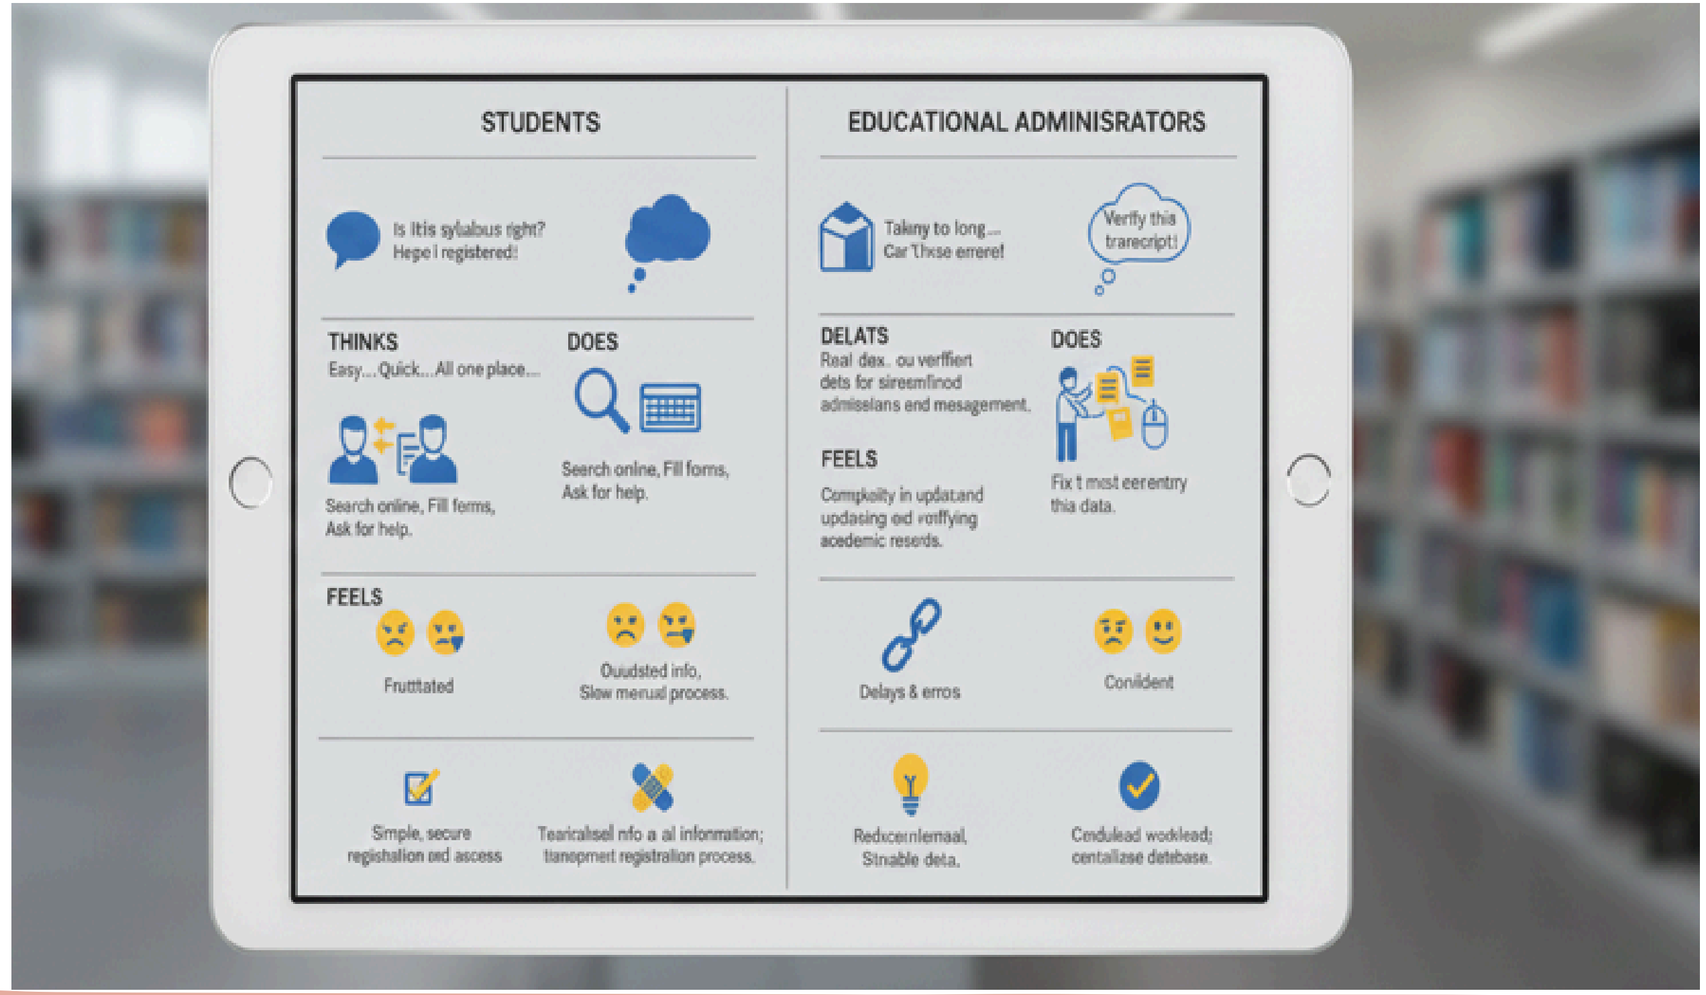

Title: Why We Need This? (The Problem)

Currently, the campus suffers from fragmented communication where important notices often get lost in email threads or physical notice boards. Students struggle to find simple information like grades or attendance, while faculty members waste valuable time on manual paperwork instead of focusing on teaching.

Requirement Analysis

Title: What Does the System Need?

The system requires specific features for different users to function effectively. Students need secure access to view their academic progress and schedules, while teachers require tools to manage attendance and upload marks. Additionally, the administration needs a powerful control panel to manage all users, ensuring the platform remains secure and fast.

Methodology

Title: How We Built It (Methodology)

We adopted the Agile methodology to build this project, which allowed us to develop the system in stages rather than all at once. We started with careful planning and sketching designs, then moved to coding the core features. This step-by-step approach allowed us to constantly test for errors and make improvements along the way.

Solution

Creates a simple and fast communication link between teachers and students

Provides one platform for sharing notes, homework, and updates

Sends instant notifications for important information

Reduces communication gaps and confusion

Saves time with organized digital communication

Improves learning through quick feedback and easy interaction

Conclusion

Edu Connect makes communication between students and teachers faster and easier.

It improves sharing of notes, assignments, and important updates.

Saves time and reduces confusion with clear communication.

A smart and modern tool for effective education

Helps students stay updated anytime, anywhere

Thank You
